POLICE EQUIPMENT BELT -18

13-01643A01

SIZES

13-01643A01-010	XS
13-01643A01-011	Small
13-01643A01-012	Medium
13-01643A01-013	Large
13-01643A01-014	XLarge
13-01643A01-015	XXLarge

DIMENSIONS:

XS= 65-93 cm, S= 75-103 cm,
M= 85-113 cm, L= 95 -123 cm,
XL= 105-133 cm, XXL= 120-148 cm.

WEIGHT

450-500 g

FEATURES

- * An ergonomically designed belt to improve your comfort when you carry a heavy load.
- * Padded inner and semi rigid outer belt construction.
- * Ergonomically shaped to fit around the body with minimum pressure.
- * High friction inside to minimize the pressure required to keep the belt up.
- * Padded inner belt for comfort.
- * Channel for cable ties.
- * The outer belt is reinforced with a semi rigid plastic sheet so it will stay up when loaded with a pistol holster.
- * The belt supports the load, does not twist or sag and remains comfortable.
- * A three point security buckle prevents unwanted opening.
- * Extra security strap over the buckle for added safety. This strap also serves as a glove holder

SNIGEL

POLICE EQUIPMENT BELT -18

13-01643A01

- * The inner belt is shaped to be placed around your body, not to be hanging straight. This makes the belt more comfortable as it has no wrinkles on the inside.
- * The inside of the belt is made of a high friction fabric that "glues" the belt to you. This prevents the belt from moving on your body and keeps it in place with less pressure than you need with other belts.
- * The belt is without seams on the inside and padded with foam to be as comfortable as possible. Outside the foam, a one mm thick plastic sheet is placed to keep the shape of the belt and to prevent uneven pouches from poking into your body, causing discomfort.
- * In the front of the inner belt there is a channel where you can place cable ties.
- * The outer belt is rigid to support the weight of the pistol holster.
- * It can be adjusted in length in both ends.
- * Velcro attaches the outer belt to the inner belt.
- * The front of the outer belt is secured to the inner belt with a band and press buttons.
- * The buckle is a three point security buckle that has to be pressed in three places to be opened.
- * In the front of the belt a D-ring and a security strap are placed.
- * When closed they give you added security and they prevent the belt from being accidentally opened.
- * Under the security strap you can place your gloves.

SNIGEL

POLICE EQUIPMENT BELT -18

13-01643A01

The belt comes in many sizes to assure a proper fit.

The belt with the security strap closed. The security strap is pushed through the D-ring and then closes in front of the buckle with Velcro.

You can place your gloves under the security strap, giving you more space on the belt for other gear.

The inner belt has friction fabric on the inside, then foam, then hard plastic, then fabric and finally hook Velcro. The outer belt is made with loop Velcro on the inside, then hard plastic, and webbing on the outside.

In the front of the inner belt there is an opening for the channel for cable ties.

The outer belt can be used without the inner belt, but it is less comfortable than with the inner belt.

The three point security buckle must be closed correctly. This picture shows the **WRONG** way.

This is how the buckle should be closed. The sides must be aligned.

The inner belt is pre shaped to fit around your body. This design makes the belt more comfortable than a traditional non shaped belt as the shaped belt will fit without wrinkles on the inside of the belt.

SNIGEL

POLICE EQUIPMENT BELT -18

13-01643A01

The pouches can be attach at different heights. This pouch is attached low.

Here the pouch is attached high

All our black pouches can be used on the belt.

Velcro strap

A self-adhesive Velcro band comes with the belt. Cut a piece of it to attach on the back of non snigel pouches. This is important to do to keep the inner and outer belts together.

Attach the pad

Remove the protective tape and secure the Velcro at the height of the Velcro strap.

The self-adhesive Velcro tape adheres well to the plastic and leather, but may have difficulty adhering to the synthetic bands. Rub the surface with a fine sandpaper. Then attach the self-adhesive Velcro tape.

The Equipment belt harness -10 is used to support the Police equipment belt. It is attached with Velcro patches between the outer and inner belt.

The Equipment belt harness -10 can move some weight from your hips to your shoulders.

On the Equipment belt harness -10 you can also attach the radio microphone and secure the cable for it.

SNIGEL

POLICE EQUIPMENT BELT -18

13-01643A01

An adjuster that makes it easy to adjust the size of the equipment belt when changing from thick clothing in the morning to thinner during the day.
Also makes it easier to adjust when sitting.

1. Disassemble the belt.

Open pressures dummies on the right side.
Undo the flap on the right side.

2. Thread the adjuster on to the outer belt.

Thread the adjuster on the strap on the right side of the outer belt.

3. Attach the adjuster.

Fold back the strap and attach it to the Velcro stripes on the outer and inner belts.
Close the push buttons.

4. Put the buckle on the belt adjuster band.

The buckle MUST be threaded like this.

Normal adjustment.

Adjust the length of the strap on the outer belt so the belt fits well with minimal clothing when the adjuster is fully tightened.
Now it is adjusted so it fits on a hot summer day.

Adjusted for cold weather

The belt adjuster is pulled out to make the belt longer.
